- 4 Carry out **sewerage drainage** work
- 5 Carry out **stormwater drainage** work
- 6 Connect a **private stormwater drain or sewer line** with a Council main

PART C ACTIVITIES

- 4 Dispose of waste into a **Council sewer main**
- 5 Install, construct or alter **waste treatment device** or **human waste storage facility**
- 6 Operate an **onsite sewerage management system (OSSM)**

Please complete Part 6 if proposed works relates to an OSSM system

Part 6: Onsite Sewerage Management Systems (OSSM)

1. OSSM system Specifications

Please identify the type of OSSM system currently on the property or proposed to be installed.

1 Standard Anaerobic Septic Tank with Absorption Trench

Tank Size (L)..... Trench Length (M).....

Is an internal baffle installed in the tank? YES NO

Is a T-Junction installed at both the tanks inlet and outlet? YES NO

2 Aerobic Wastewater Treatment System (AWTS)

Tank/s Size (L)..... Brand Name.....

Specify Disposal Type

Absorption Trench – (Trench Length (M)).....

Transpiration Bed – (Disposal Area (M²)).....

Subsurface Irrigation – (Disposal Area (M²)).....

Surface Irrigation – (Disposal Area (M²)).....

Does the system include any other forms of waste water treatment devices or alternatives (ie. reed beds, worm farms etc.)

YES NO

If answered yes please specify

.....

3 Alternative Waste Water Treatment System (ie. composting toilet etc.)

Please specify

.....

2. Effluent Disposal Area Particulars

Please tick the appropriate selections and provide information where required

What is the soil type around the around the effluent disposal area?

Heavy Clay Medium Clay Light Clay Silty Clay Clay Loam

Loam Sandy Loam Sand Rock Not Known

What is the land gradient (slop) around the effluent disposal area?

Flat Ground (<10°) Slight Slope (10°- 20°)

Sloping (20°- 40°) Steep Slope (>40°)

Disposal area distance from closest waterway, bore or dam(M)(KM)

Is the disposal area located uphill or downhill from this nearest waterway, bore or dam?

Uphill Downhill Flat Ground

3. Occupancy Rate Assessment

To help us to correctly identify the occupancy or use rate for the OSSM systems on the property please specify the following.

Is the OSSM system associated with a residential dwelling/s

YES NO

What is the total number of rooms capable for use as sleeping accommodation (ie. Bedrooms, study etc.)

Total No. of Rooms

Is the OSSM system associated with a non- residential dwelling/s

YES NO

What is the maximum expected number of people to use the sanitary facilities per day (at peak times)

Total No. of people.....

Part 7: Application Particulars and Attachments

This application is made under Section 68 of the Local Government Act 1993 in relation to a number of activities as they relate to water supply, sanitary drainage and stormwater drainage works and the installation, modification and operation of onsite sewerage management systems (OSSM) on private land.

NOTES

- Only plumbers and/or drainers licensed in NSW are permitted to carry out work plumbing and drainage work on private land.
- Owners and Applicants must ensure that all appropriate council approvals have been issued prior to engaging a plumber to start work. (Penalties may apply).
- Plumbers must ensure they complete a Notice of Work form and submit it to the Council at least Two (2) days before any work commences onsite. (Penalties may apply)
- Applicants will be advised by Council in writing of the determination of their application. No work or activity is permitted to be undertaken until Council "Approval" is issued and a Plumbing & Drainage Permit processed.
- Applicants undertake to carry out any activity in compliance with the approval and any conditions of approval.

Attachments

Applications involving larger developments requiring hydraulic design eg multi residential, commercial, fire service upgrades, etc require three (3) copies of hydraulic drawings signed by a suitably qualified person.

Applications involving on-site sewerage management systems shall be accompanied by three (3) copies of an on-site sewerage management design report signed by a suitably qualified person that includes:

Plan: A site plan drawn to scale, showing north point and the location of:

- The sewage management facility proposed to be installed or constructed on the premises; and
- Any related effluent application areas and reserve areas; and
- Any buildings or facilities (including swimming pools) or any environmentally sensitive areas (including permanent waterways) located within 100 metres of the sewage management facility or effluent application area

Specifications: The application must be accompanied by full specifications of the sewage management facility proposed to be installed or constructed on the premises concerned

Site assessment: The application must be accompanied by details of the topography soil composition and vegetation of any effluent application areas related to the sewage management facility together with an assessment of the site in the light of those details

Statement: A statement of:

- The number of persons residing, or probable number of persons to reside, on the premises; and
- Such other factors as are relevant to the capacity of the proposed sewage management facility

Operation and Maintenance: Details of:

- The operation and maintenance requirements of the proposed sewage management facility; and
- The proposed operation, maintenance and servicing arrangements intended to meet those requirements
- The action to be taken in the event of a breakdown in, or other interference with, its operation
