MUTTAMA CREEK DESCRIPTION OF WORKS:

Permit to conduct maintenance works within Cootamundra Shire has been approved by DPI Fisheries and Crown Land. Permit allows desilting and vegetation removal maximum 10m upstream and downstream of drainage structures located within the creek (e.g. Bridges, culverts and causeways). Current focus is within Cootamundra township with plans to move on to Stockinbingal in the coming months as program allows. Current works are to encourage creek flows past and through structures as originally designed. This will allow further investigation into how the creek channel levels have changed due to sediment build up and allow for an accurate scope of works to be developed to address the current issues with the creek.
